MFS Investment Management

MFS was founded in 1924 on the belief that earnings growth along with valuation discipline are the most important drivers of stock price performance and that quality is often underappreciated by the market.

Bristol Gate Capital Partners

Bristol Gate was founded in 2006 and their focus is on growth of income, using proprietary analytics and fundamental analysis. They believe the risk of capital loss is mitigated by investing in businesses that possess predictable dividend growth characteristics.

Mawer Investment Management

Founded in 1974 by Charles Mawer, the firm's bottom-up fundamental research process seeks to identify high-quality growth companies trading at a discount to their intrinsic value, relative to the market.
